Executive summary

Past performance does not predict future results.

Portfolio Performance

The portfolio's relative performance versus its benchmark over the quarter was primarily driven by security selection.

CONTRIBUTORS

- Security selection within the aerospace & defense sector, as select overweight issuers outperformed the broader market during the quarter.
- Security selection within the automotive sector, as a select overweight issuer outperformed amid a tender offer and positive earnings guidance.
- An underweight to the wireline telecom sector, as the sector underperformed the broader market.

DETRACTORS

- Security selection within the healthcare sector, as a select overweight issuer underperformed amid weaker-than-expected earnings results while a select underweight issuer outperformed.
- An overweight to and security selection within the transportation sector, as the sector as well as a select overweight issuer underperformed the broader market over the quarter amid weaker-than-expected earnings results.

Past Performance is not a guarantee or reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future.

The following information should be read in conjunction with the 12-month rolling past performance information provided later in this presentation

Portfolio strategy

We continue to emphasize sectors that are asset-rich and defensive in nature, favouring industries and issuers that we expect to benefit from secular trends, have the opportunity to de-lever and may benefit from merger activity. Conversely, we are cautious towards sectors with unfavourable valuations and those that face cyclical or secular headwinds.

We are currently looking to keep the portfolio's overall credit risk exposure flat to modestly overweight versus the index, balancing current spread valuations with strong technical trends in the market. At the same time, we continue to look for opportunities to reduce exposure in credits with weak fundamentals and limited liquidity runways, as we have done in recent quarters.

Fund specific risks

Risk	Risk Description
Credit and Default Risk	A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk.
Currency Risk	Changes in exchange rates may cause the value of investments to decrease or increase.
Derivatives and Counterparty Risk	The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations.
Liquidity Risk	Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price.
Interest Rate Risk	Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices).

Quarter in Review

High yield spreads tightened during Q4, driven by strong performance in November and December.

U.S. high yield spreads tightened by 67bp during the fourth quarter, driven predominantly by strong performance in November and December. Starting in November, commentary from the Federal Reserve appeared to suggest a shift to a more dovish policy stance going forward as inflation data continued to moderate while growth has remained supported. Against this backdrop, the U.S. high yield market posted strong positive excess and total returns during the quarter, as interest rates rallied and credit spreads tightened. The high yield market also continued to display positive ratings momentum during the quarter, with ~\$47bn of rising stars outpacing ~\$6bn of fallen angels over the quarter, as Ford returned to an investment grade rating.

Returns by Asset Class ■ Q4 '23 ■ YTD

On a total return basis, U.S. high yield outperformed treasuries over the course of the quarter, as the asset class benefitted from both spread tightening as well as rallying rates, but modestly underperformed the U.S. IG market due to the lower duration of the high yield asset class.

Source: Bloomberg, ICE BofA. Treasuries: Bloomberg U.S. Treasury Index; U.S. IG: Bloomberg U.S. Credit Index; EM Bonds: J.P. Morgan EMBI Global Index; U.S. Equities: S&P 500 Index; Euro HY: ICE BofA European Currency High Yield Index (USD Hedged); U.S. HY: ICE BofA U.S. High Yield Index; Global HY: ICE BofA Developed Markets High Yield Constrained Index (USD Hedged).

Total returns by quality – 4Q23 ■ QTD ■ YTD

During the fourth quarter, the BB-rated cohort of the U.S. high yield market slightly outperformed the lower-rated segments on a total return basis, partly reversing the underperformance in the previous quarter.

Source: ICE BofA. Returns are USD hedged and represented by the respective sub-indices of the ICE BofA U.S. High Yield Constrained Index.

Market Summary

Security selection contributed to relative performance over the quarter

Security selection in the aerospace & defense sector and in the automotive sector contributed to performance, while security selection in the transportation and healthcare sectors detracted from performance. An underweight to the wireline telecom sector also contributed to performance over the quarter.

Aerospace & defense

Security selection within the aerospace & defense sector contributed to performance, as select overweight issuers outperformed the broader market during the quarter and as an attractively priced new issue from a leading aerospace manufacturer outperformed in the secondary market.

Automotive

Security selection within the automotive sector contributed to performance, as a select overweight issuer outperformed amid a tender offer and positive earnings guidance.

Wireline telecom

An underweight to the wireline telecom sector contributed to performance, as the sector underperformed the broader market amid continued concerns around elevated leverage levels and substantial capital expenditure plans.

Source: ICE BofA. Returns are USD hedged and represented by the sectors within the ICE BofA U.S. High Yield Constrained Index

Navigating the Descent: Four economic themes

**Peak inflation and
rising unemployment
consistent with rate cuts**

**Soft landings are possible,
but risks remain**

**Markets already price a
substantial cutting cycle**

**Global divergence
in monetary policy**

Portfolio Outlook

Strategic Outlook

While U.S. high yield spreads are now trading well below their median level over the past 20 years again, all-in yields remain attractive for long-term investors. At the same time, credit fundamentals have remained relatively resilient, in particular in more defensive sectors, and the quality composition of the U.S. high yield market remains strong as BB-rated issuers continue to make up close to half of the universe, even after a record amount of realised rising stars in 2022 and 2023. That said, pockets of weakness do exist, and higher interest rates as well as tighter financial conditions have started to impact fundamentals in select sectors such as real estate and wireline telecom.

Key strategies

Attractive Total Return Potential

Starting yields in the high yield asset class are attractive and elevated high yield carry continues to provide a sizeable buffer or “margin of safety” against widening spreads, rising yields, and increasing credit losses. We expect default rates to continue to increase modestly into the low-to-mid single digits, but to remain below the levels seen in previous episodes of slowing growth.

Credit Opportunities

We continue to look for credits that may be potential rising stars or acquisition targets, those that have resilient operating trends and the capacity to de-lever, and those whose valuations are relatively attractive compared to the rest of the opportunity set.

Industry Weightings

We generally continue to favor defensive, non-cyclical sectors with relatively stable cash flows such as Food & Beverage, Packaging, Pipelines, Media Cable, and Healthcare. We also remain constructive on select Lodging, Airline and Aerospace & Defense issuers as consumer demand for travel, leisure and entertainment services has remained strong. On the other hand, we remain underweight to Wireline Telecom issuers given elevated leverage levels and cash flow pressures. We also continue to take a cautious approach towards asset-light names in the Technology sector and towards more cyclical sectors such as Retailers, Automotive, and Home Construction. Additionally, we retain a more cautious stance towards commodity-sensitive sectors such as Metals & Mining and Independent E&P.

Discount-to-par Opportunities

With average cash bond prices of approximately 94c as of the end of the quarter, we continue to find a number of attractive opportunities to pick up resilient credits from high quality issuers at discounts to par.

PERFORMANCE AND FEE

Past performance is not a guarantee or a reliable indicator of future results. The "gross of fees" performance figures, if included, are presented before management fees and custodial fees, but do reflect commissions, other expenses and reinvestment of earnings. The "net of fees" performance figures reflect the deduction of ongoing charges. All periods longer than one year are annualized.

Investments made by a Fund and the results achieved by a Fund are not expected to be the same as those made by any other PIMCO-advised Fund, including those with a similar name, investment objective or policies. A new or smaller Fund's performance may not represent how the Fund is expected to or may perform in the long-term. New Funds have limited operating histories for investors to evaluate and new and smaller Funds may not attract sufficient assets to achieve investment and trading efficiencies. A Fund may be forced to sell a comparatively large portion of its portfolio to meet significant shareholder redemptions for cash, or hold a comparatively large portion of its portfolio in cash due to significant share purchases for cash, in each case when the Fund otherwise would not seek to do so, which may adversely affect performance.

Outlook

Statements concerning financial market trends or portfolio strategies are based on current market conditions, which will fluctuate. There is no guarantee that these investment strategies will work under all market conditions or are appropriate for all investors and each investor should evaluate their ability to invest for the long term, especially during periods of downturn in the market. Outlook and strategies are subject to change without notice.

Portfolio structure is subject to change without notice and may not be representative of current or future allocations.

Forecasts, estimates and certain information contained herein are based upon proprietary research and should not be interpreted as investment advice, as an offer or solicitation, nor as the purchase or sale of any financial instrument. Forecasts and estimates have certain inherent limitations, and unlike an actual performance record, do not reflect actual trading, liquidity constraints, fees, and/or other costs. In addition, references to future results should not be construed as an estimate or promise of results that a client portfolio may achieve.

Important Disclosures

Benchmark

Unless referenced in the prospectus and relevant key investor information document /Key Information Document, a benchmark or index in this material is not used in the active management of the Fund, in particular for performance comparison purposes.

Where referenced in the prospectus and relevant key investor information document /Key Information Document a benchmark may be used as part of the active management of the Fund including, but not limited to, for duration measurement, as a benchmark which the Fund seeks to outperform, performance comparison purposes and/or relative VaR measurement. Any reference to an index or benchmark in this material, and which is not referenced in the prospectus and relevant key investor information document /Key Information Document, is purely for illustrative or informational purposes (such as to provide general financial information or market context) and is not for performance comparison purposes. Please contact your PIMCO representative for further details.

The fund is actively managed in reference to the ICE BofAML US High Yield Constrained Index as further outlined in the prospectus and key investor information document /Key Information Document.

Correlation

As outlined under "Benchmark", where [disclosed herein] and referenced in the prospectus and relevant key investor information document /Key Information Document, a benchmark may be used as part of the active management of the Fund. In such instances, certain of the Fund's securities may be components of and may have similar weightings to the benchmark and the Fund may from time to time show a high degree of correlation with the performance of any such benchmark. However the benchmark is not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.

Investors should note that a Fund may from time to time show a high degree of correlation with the performance of one or more financial indices not referenced in the prospectus and relevant key investor information document /Key Information Document. Such correlation may be coincidental or may arise because any such financial index may be representative of the asset class, market sector or geographic location in which the Fund is invested or uses a similar investment methodology to that used in managing the Fund.

ESG Category Article 6 Funds: Article 6 funds do not have sustainable investment as its objective, nor do they promote environmental and/or social characteristics.

While such funds integrate sustainability risks into its investment policy (as further outlined in the Prospectus) and this integration process forms part of the investment level due diligence of the fund, ESG information is not the sole or primary consideration for any investment decision with respect to the fund. As the Fund is actively managed and does not promote environmental or social characteristics, the climate related holdings are not static and may vary considerably overtime.

GIS Funds

PIMCO Funds: Global Investors Series plc is an umbrella type open-ended investment company with variable capital and is incorporated with limited liability under the laws of Ireland with registered number 276928. The information is not for use within any country or with respect to any person(s) where such use could constitute a violation of the applicable law. The information contained in this communication is intended to supplement information contained in the prospectus for this Fund and must be read in conjunction therewith. Investors should consider the investment objectives, risks, charges and expenses of these Funds carefully before investing. This and other information is contained in the Fund's prospectus. Please read the prospectus carefully before you invest or send money. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Returns are net of fees and other expenses and include reinvestment of dividends. The performance data represents past performance and investment return and principal value will fluctuate so that the PIMCO **GIS Funds** shares, when redeemed, may be worth more or less than the original cost. Potential differences in performance figures are due to rounding. The Fund may invest in non- U.S. or non-Eurozone securities which involves potentially higher risks including non-U.S. or non-Euro currency fluctuations and political or economic uncertainty. For informational purposes only. Please note that not all Funds are registered for sale in every jurisdiction. Please contact PIMCO Europe Ltd for more information. For additional information and/or a copy of the Fund's prospectus, please contact the Administrator: State Street Fund Services (Ireland) Limited, Telephone +353-1-776-0142, Fax +353-1-562-5517. ©2024.

Important Disclosures

Acronyms and definitions of investment terms used throughout the report:

Alpha is a measure of performance on a risk-adjusted basis calculated by comparing the volatility (price risk) of a portfolio vs. its risk-adjusted performance to a benchmark index; the excess return relative to the benchmark is alpha.

Average coupon is the average of the coupon payments of the underlying bonds within the portfolio.

Average effective maturity is a weighted average of all the maturities of the bonds in a portfolio, computed by weighting each bond's effective maturity by the market value of the security.

"Bend-but-not-break" refers to credits that PIMCO would not expect to default in a credit-stressed environment.

Beta is a measure of price sensitivity to market movements. Market beta is 1.

Breakeven inflation rate (or expectation) is a market-based measure of expected inflation or the difference between the yield of a nominal and an inflation-linked bond of the same maturity.

Carry is the rate of interest earned by holding the respective securities.

The terms **"cheap"** and **"rich"** as used herein generally refer to a security or asset class that is deemed to be substantially under- or overpriced compared to both its historical average as well as to the investment manager's future expectations. There is no guarantee of future results or that a security's valuation will ensure a profit or protect against a loss.

CPI is the Consumer Price Index.

The **credit quality** of a particular security or group of securities does not ensure the stability or safety of an overall portfolio. The quality ratings of individual issues/issuers are provided to indicate the credit-worthiness of such issues/issuer and generally range from AAA, Aaa, or AAA (highest) to D, C, or D (lowest) for S&P, Moody's, and Fitch respectively.

Dividend yield is represented by the weighted average coupon divided by the weighted average price.

Duration is the measure of a bond's price sensitivity to interest rates and is expressed in years.

Effective duration is the duration for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change.

Forward curve is a function graph that defines the prices at which a contract for future delivery or payment can be concluded today.

Fallen angel is a bond that was initially given an investment grade rating but has since been reduced to below investment grade status.

GFC is the Global Financial Crisis.

Information ratio is a ratio of portfolio returns above the returns of a benchmark to the volatility of those returns.

Like-duration Securities are calculated by the index provider by comparing the index return to a hypothetical matched position in the security.

LNG is Liquefied Natural Gas.

The **Option Adjusted Spread (OAS)** measures the spread over a variety of possible interest rate paths. A security's OAS is the average return an investor will earn over Treasury returns, taking all possible future interest rate scenarios into account. The OAS is the net spread over the swap curve that will on average be earned if the security is held to maturity.

Rising star is the term given to a bond that was rated high yield but has since been upgraded to investment grade.

"Risk assets" are any financial security or instrument that are likely to fluctuate in price.

Risk premia is the return in excess of the risk-free rate of return an investment is expected to yield.

Roll yield is the yield that a futures investor captures as their long position in a futures contract converges to the spot price.

"Safe haven" is an investment that is expected to retain or increase in value during times of market turbulence.

"Safe Spread" is defined as sectors that we believe are most likely to withstand the vicissitudes of a wide range of possible economic scenarios. All investments contain risk and may lose value.

The **SEC yield** is an annualized yield based on the most recent 30 day period. The subsidized yield includes contractual expense reimbursements and it would be lower without those reimbursements. The

Unsubsidized 30 day SEC Yield excludes contractual expense reimbursements.

Tracking error measures the dispersion or volatility of excess returns relative to a benchmark.

To relate the price sensitivity of ILBs to changes in nominal yields, yield beta is applied to nominal changes to arrive at a price sensitivity of ILBs to changes in nominal rates. A **yield beta** of 0.90 implies that if nominal yields move 100 basis points, real yields will move 90 basis points. ILBs with long maturity may respond differently to changes in nominal rates than shorter maturity ILBs.

The distribution yield for monthly paying Funds is calculated by annualizing actual dividends distributed for the monthly period ended on the date shown and dividing by the net asset value on the last business day for the same period. The distribution yield for quarterly paying Funds is calculated by taking the average of the prior four quarterly distribution yields. The quarterly distribution yields are calculated by annualizing actual dividends distributed for the quarterly period ended on the most recent quarterly distribution date and dividing by the net asset value for the same date. The yield does not include long- or short-term capital gains distributions.
