IMPORTANT NOTICE

Please note that this material contains the opinions of the manager as of the date noted, and may not have been updated to reflect real time market developments. All opinions are subject to change without notice.

Executive summary

Past performance does not predict future results.

Portfolio Performance

The portfolio generated a positive return during the first quarter as sentiment in the global bank capital market continued to improve, leading to spread compression more than offsetting the effect of increased interest rates. Exposure to Additional Tier 1 bonds, and in particular to select Dutch and UK issuers, contributed to performance.

CONTRIBUTORS

- Exposure to Additional Tier 1 bonds, and in particular to select Dutch and UK issuers contributed to performance, as spreads tightened over the period.
- Exposure to Tier 2 bonds, and in particular to select Italian and French issuers, contributed to performance as spreads tightened over the period.
- Exposure to Senior Financial bonds, and in particular to select Italian issuers contributed to performance as spreads tightened over the period.

DETRACTORS

- Exposure to a select non-financial issuer detracted from performance, as the issuer's bonds spreads widened.
- There were no other material detractors for this Fund.

Performance periods ended 31 Mar '24	3 mos.	6 mos.	1 yr.	3 yrs.	5 yrs.	10 yrs.	SI

Benchmark*	1.35	2.74	5.44	2.80	2.24	1.64	1.56

Past Performance is not a guarantee or reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future.

The following information should be read in conjunction with the 12-month rolling past performance information provided later in this presentation

Portfolio strategy

PIMCO favors investments in Additional Tier 1 (“AT1”) bonds from large systemic banks which benefit from high capital levels and years of balance sheet de-risking. The Fund is well diversified across both geographies and capital structure, with exposure to senior bank debt providing a more defensive source of spread.

The Fund favors AT1s from systemic banks and national champions with ample capital buffers, robust equity cushions and a diversified revenue stream. At the same time, the Fund remains cautious on smaller issuers and those with more limited scope for organic capital generation. Geographically, the Fund is well diversified and favors countries such as the UK, Netherlands and France where banks have the highest levels of capital. In senior and Tier 2 debt, the exposure remains mostly centered on UK banks, as well as select idiosyncratic opportunities in peripheral and core European banks offering upside through improving fundamentals and potential consolidation.

*The fund is actively managed in reference to the ICE BofA SOFR Overnight Rate Index as further outlined in the prospectus and key investor information document/key information document

Fund specific risks

Risk	Risk Description
Credit and Default Risk	A decline in the financial health of an issuer of a fixed income security can lead to an inability or unwillingness to repay a loan or meet a contractual obligation. This could cause the value of its bonds to fall or become worthless. Funds with high exposures to non-investment grade securities have a higher exposure to this risk.
Currency Risk	Changes in exchange rates may cause the value of investments to decrease or increase.
Derivatives and Counterparty Risk	The use of certain derivatives could result in the fund having a greater or more volatile exposure to the underlying assets and an increased exposure to counterparty risk. This may expose the fund to larger gains or losses associated with market movements or in relation to a trade counterparty being unable to meet its obligations.
Liquidity Risk	Difficult market conditions could result in certain securities becoming hard to sell at a desired time and price.
Interest Rate Risk	Changes in interest rates will usually result in the values of bond and other debt instruments moving in the opposite direction (e.g. a rise in interest rates likely leads to fall in bond prices).

ESG Investment Risk

- At PIMCO, we define ESG Integration as the consistent consideration of material ESG factors into our investment research process to enhance our clients' risk-adjusted returns. Material ESG factors may include but are not limited to: climate change risks, social inequality, shifting consumer preferences, regulatory risks, talent management or misconduct at an issuer, among others.
- We recognize that ESG factors are increasingly essential inputs when evaluating global economies, markets, industries and business models. Material ESG factors are important considerations when evaluating long-term investment opportunities and risks for all asset classes in both public and private markets.
- Integrating ESG factors into the evaluation process does not mean that ESG information is the sole or primary consideration for an investment decision; instead, PIMCO's portfolio managers and analyst teams evaluate and weigh a variety of financial and non-financial factors, which can include ESG considerations, to make investment decisions. The relevance of ESG considerations to investment decisions varies across asset classes and strategies.
- The Fund's ESG investing strategy may select or exclude securities of certain issuers for reasons other than financial performance. Such strategy carries the risk that the Fund's performance will differ from similar funds that do not utilize an ESG investing strategy. For example, the application of this strategy could affect the Fund's exposure to certain sectors or types of investments, which could negatively impact the Fund's performance.
- There is no guarantee that the factors utilized by the Investment Advisor will reflect the opinions of any particular investor, and the factors utilized by the Investment Advisor may differ from the factors that any particular investor considers relevant in evaluating an issuer's ESG practices.
- Future ESG development and regulation may impact the Fund's implementation of its investment strategy. In addition, there may be cost implications arising from ESG related due diligence, increased reporting and use of third-party ESG data providers.

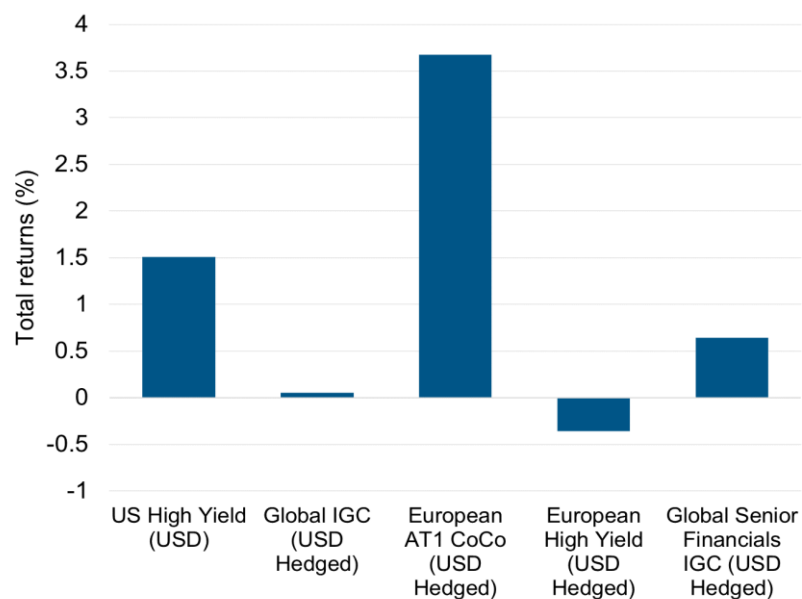

Quarter in Review

Spreads in subordinated and senior financial debt tightened during the quarter

The global bank capital market, and in particular the more subordinated parts of banks' capital structure continued to rally over the quarter. This rally was driven by tighter credit spreads, as the resilience of the macro-economic environment raised the prospects for a soft landing. Commentary from the Federal Reserve dampened expectations for a Q1 rate cut and US inflation data proved to be stickier than expected, which led to rising rates. The negative impact from rising interest rates, however, was more than offset by spread compression.

The first quarter of the year has seen relatively strong performance from the capital securities markets, particularly subordinated bank debt, with the Bloomberg European Banks Additional Tier 1 (AT1) Index generating returns of +3.67% (USD hedged) while the Bloomberg Global Agg Corp Senior Financials Index rose by +0.6% (USD hedged).

Performance of major indices - Q1 '24

In the first quarter, the European AT1 market returned +3.7% (USD hedged) while Global Senior Financials returned +0.6% (USD hedged). Both AT1s and senior bonds benefitted from a recovery in risk appetite as spreads continued to tighten, after they had widened significantly in March last year. Rates rose as US inflation data appeared stickier than expected, which negatively affected returns.

Source: Bloomberg. European AT1 CoCo USD Hedged (Bloomberg European Tier 1 CoCo Index); US High Yield (The BofA Merrill Lynch U.S. High Yield Constrained Index); European High Yield USD Hedged (Merrill Lynch European Currency High Yield Constrained Index); Global IGC USD Hedged (Bloomberg Global Agg Credit Index); Global Senior Financials IGC USD Hedged (Bloomberg Global Agg Corp Senior Financial Institutions).

Bloomberg European AT1 Index - Excess Return by Country

On an excess return basis, AT1s from peripheral banks outperformed as select banks within these countries continued to report increases in net interest margins and net interest income. Irish and Nordic banks underperformed over the quarter as spreads of bonds from these issuers experienced more limited compression.

Market Summary

The portfolio generated a positive return during the first quarter as sentiment in the global bank capital market continued to improve since the crisis of confidence which took place in March last year.

Exposure to AT1s

Exposure to Additional Tier 1 bonds, and in particular to select Dutch and UK issuers contributed to performance, as spreads tightened over the period.

Exposure to Tier 2s

Exposure to Tier 2 bonds, and in particular to select Italian and French issuers, contributed to performance as spreads tightened over the period.

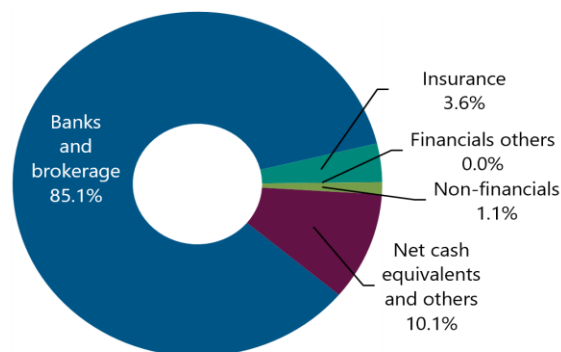

Exposure to senior financial bonds

Exposure to Senior Financial bonds, and in particular to select Italian issuers contributed to performance as spreads tightened over the period.

Region of issuer (%)

*Additional Tier 1' also includes positions in Core Capital Deferred Shares (CCDS) and Member Certificates.

Investment implications: Opportune time to consider going active in global fixed income

Look global

Greater-than-usual focus on bond markets outside of the U.S.

Lock in elevated yields

Intermediate maturities can offer a “sweet spot” with markets expecting cash rates to fall

Favor high quality

Up-in-quality bias in both public and private credit markets

Go active

Differentiated macro paths present compelling opportunities for active investors

Portfolio Outlook

Bank capital provides attractive yield

While Capital Securities remain exposed to the ongoing economic uncertainty, sector fundamentals continue to show resiliency and valuations look attractive compared to other parts of the fixed income universe, particularly given AT1 yields remain elevated versus history. The Fund offers an attractive combination of yield (yield to maturity at 7.7% and yield to next call at 7.2%, USD hedged) and duration (3.7 years) while maintaining an average investment grade rating. The core of the strategy remains centered on national champions in each country, all of them benefiting from strong capital positions, as highlighted by their solid performance across various central bank stress tests.

Key strategies

Solid fundamentals

The banking sector is entering this period of economic uncertainty with strong initial conditions in credit fundamentals. Banks' asset quality has remained resilient and capital buffers are at or close to record highs. While elevated inflation, higher interest rates and tighter financial conditions will inevitably have an impact on the broader economy, banks are well positioned given their strong fundamentals following more than a decade of restructuring, de-risking and de-leveraging and remain more insulated from inflationary pressures relative to other sectors in corporate credit.

Attractive valuations

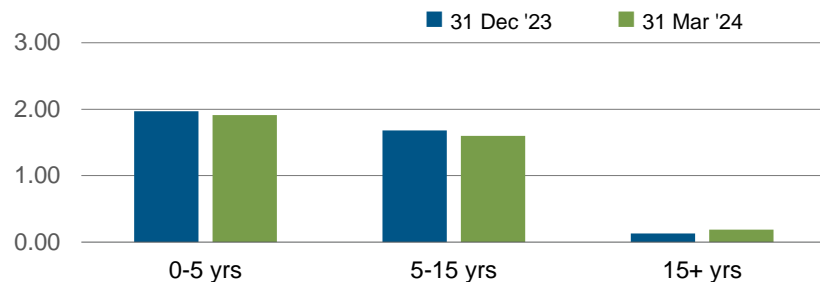

Valuations look attractive compared to other parts of the fixed income universe, particularly given AT1 yields remain elevated versus history. While market stress related to events over the course of March 2023 propagated primarily to the most junior part of banks' capital structures, over the last year we have seen a strong recovery in prices, particularly in November and December 2023, with AT1s now trading at the 20th percentile of daily spread data since inception of the index in 2014. More senior parts of the capital structure also sold off last year, despite not being subject to the write-down/conversion mechanism of AT1s. Senior Financials are currently trading at the 45th percentile of daily spread data since the inception of the AT1 index in 2014, thus providing attractive spreads compared to historical levels.

Benefitting from higher rates

Most banks are uniquely positioned to continue to benefit from higher rates, particularly in Europe. Banks in Europe are by far the biggest beneficiaries within the developed market banking system. Financial results published in the fourth quarter of 2023 continued to indicate that the benefits of abandoning negative rates have become visible on banks' P&Ls. While we believe 2023 likely marked peak earnings for banks in the US and Europe, it is important to stress that we do not expect a return to an environment of extremely low or negative interest rates, which was the case for much of the last decade and which put bank earnings under significant pressure.

Marketing Communication

This is a marketing communication. This is not a contractually binding document and its issuance is not mandated under any law or regulation of the European Union or the United Kingdom. This marketing communication does not include sufficient detail to enable the recipient to make an informed investment decision. Please refer to the Prospectus of the UCITS and to the KIID/KID before making any final investment decisions.

For professional use only

The services and products described in this communication are only available to professional clients as defined in the MiFiD II Directive 2014/65/EU Annex II Handbook and its implementation of local rules and as defined in the Financial Conduct Authority's Handbook. This communication is not a public offer and individual investors should not rely on this document. Opinion and estimates offered constitute our judgment and are subject to change without notice, as are statements of financial market trends, which are based on current market conditions. We believe the information provided here is reliable, but do not warrant its accuracy or completeness.

For qualified investor use only

The information provided herein does not constitute an offer of the product incorporated in Ireland, in Switzerland pursuant to the Swiss Federal Law on Financial Services ("FinSA") and its implementing ordinance. This is solely an advertisement pursuant to FinSA and its implementing ordinance for the product. Swiss representative and paying agent : BNP PARIBAS, Paris, Zurich branch, Selnastrasse 16, 8002 Zurich, Switzerland. The prospectus, articles of association, Key Information Document(s) and annual and semi-annual financial reports of the product may be obtained free of charge from the Swiss representative.

Additional Information/Documentation

A Prospectus is available for PIMCO Funds and UCITS Key Investor Information Documents (KIIDs) (for UK investors) and Packaged retail and insurance-based investment products (PRIIPS) key information document (KIDs) are available for each share class of each the sub-funds of the Company. The Company's Prospectus can be obtained from www.fundinfo.com and is available in English, French, German, Italian, Portuguese and Spanish. The KIIDs and KIDs can be obtained from www.fundinfo.com and are available in one of the official languages of each of the EU Member States into which each sub-fund has been notified for marketing under the Directive 2009/65/EC (the UCITS Directive). In addition, a summary of investor rights is available from www.pimco.com. The summary is available in English. The sub-funds of the Company are currently notified for marketing into a number of EU Member States under the UCITS Directive. PIMCO Global Advisors (Ireland) Limited can terminate such notifications for any share class and/or sub-fund of the Company at any time using the process contained in Article 93a of the UCITS Directive.

PERFORMANCE AND FEE

Past performance is not a guarantee or a reliable indicator of future results. The "gross of fees" performance figures, if included, are presented before management fees and custodial fees, but do reflect commissions, other expenses and reinvestment of earnings. The "net of fees" performance figures reflect the deduction of ongoing charges. All periods longer than one year are annualized.

Investments made by a Fund and the results achieved by a Fund are not expected to be the same as those made by any other PIMCO-advised Fund, including those with a similar name, investment objective or policies. A new or smaller Fund's performance may not represent how the Fund is expected to or may perform in the long-term. New Funds have limited operating histories for investors to evaluate and new and smaller Funds may not attract sufficient assets to achieve investment and trading efficiencies. A Fund may be forced to sell a comparatively large portion of its portfolio to meet significant shareholder redemptions for cash, or hold a comparatively large portion of its portfolio in cash due to significant share purchases for cash, in each case when the Fund otherwise would not seek to do so, which may adversely affect performance.

Outlook

Statements concerning financial market trends or portfolio strategies are based on current market conditions, which will fluctuate. There is no guarantee that these investment strategies will work under all market conditions or are appropriate for all investors and each investor should evaluate their ability to invest for the long term, especially during periods of downturn in the market. Outlook and strategies are subject to change without notice.

Portfolio structure is subject to change without notice and may not be representative of current or future allocations.

Forecasts, estimates and certain information contained herein are based upon proprietary research and should not be interpreted as investment advice, as an offer or solicitation, nor as the purchase or sale of any financial instrument. Forecasts and estimates have certain inherent limitations, and unlike an actual performance record, do not reflect actual trading, liquidity constraints, fees, and/or other costs. In addition, references to future results should not be construed as an estimate or promise of results that a client portfolio may achieve.

Important Disclosures

Benchmark

Unless referenced in the prospectus and relevant key investor information document /Key Information Document, a benchmark or index in this material is not used in the active management of the Fund, in particular for performance comparison purposes.

Where referenced in the prospectus and relevant key investor information document /Key Information Document a benchmark may be used as part of the active management of the Fund including, but not limited to, for duration measurement, as a benchmark which the Fund seeks to outperform, performance comparison purposes and/or relative VaR measurement. Any reference to an index or benchmark in this material, and which is not referenced in the prospectus and relevant key investor information document /Key Information Document, is purely for illustrative or informational purposes (such as to provide general financial information or market context) and is not for performance comparison purposes. Please contact your PIMCO representative for further details.

The fund is actively managed in reference to the ICE BofA SOFR Overnight Rate Index as further outlined in the prospectus and key investor information document /Key Information Document.

Correlation

As outlined under "Benchmark", where disclosed herein and referenced in the prospectus and relevant key investor information document /Key Information Document, a benchmark may be used as part of the active management of the Fund. In such instances, certain of the Fund's securities may be components of and may have similar weightings to the benchmark and the Fund may from time to time show a high degree of correlation with the performance of any such benchmark. However the benchmark is not used to define the portfolio composition of the Fund and the Fund may be wholly invested in securities which are not constituents of the benchmark.

Investors should note that a Fund may from time to time show a high degree of correlation with the performance of one or more financial indices not referenced in the prospectus and relevant key investor information document /Key Information Document. Such correlation may be coincidental or may arise because any such financial index may be representative of the asset class, market sector or geographic location in which the Fund is invested or uses a similar investment methodology to that used in managing the Fund.

For Sustainable Finance Disclosure Regulation (SFDR) Categorization: Article 8/9

SFDR Categorization sets out how the fund is categorized for the purposes of Regulation (EU) 2019/ 2088 on Sustainability related Disclosures in the Financial Services Sector (SFDR) Article 8 & 9 Funds promote, among other characteristics, environmental or social characteristics. Further details are set out in the Prospectus and relevant Fund Supplement

Investors should note that, relative to the expectations of the Autorité des Marchés Financiers, this Fund presents disproportionate communication on the consideration of non financial criteria in its investment policy

GIS Funds

PIMCO Funds: Global Investors Series plc is an umbrella type open-ended investment company with variable capital and is incorporated with limited liability under the laws of Ireland with registered number 276928. The information is not for use within any country or with respect to any person(s) where such use could constitute a violation of the applicable law. The information contained in this communication is intended to supplement information contained in the prospectus for this Fund and must be read in conjunction therewith. Investors should consider the investment objectives, risks, charges and expenses of these Funds carefully before investing. This and other information is contained in the Fund's prospectus. Please read the prospectus carefully before you invest or send money. Past performance is not a guarantee or a reliable indicator of future results and no guarantee is being made that similar returns will be achieved in the future. Returns are net of fees and other expenses and include reinvestment of dividends. The performance data represents past performance and investment return and principal value will fluctuate so that the PIMCO **GIS Funds** shares, when redeemed, may be worth more or less than the original cost. Potential differences in performance figures are due to rounding. The Fund may invest in non- U.S. or non-Eurozone securities which involves potentially higher risks including non-U.S. or non-Euro currency fluctuations and political or economic uncertainty. For informational purposes only. Please note that not all Funds are registered for sale in every jurisdiction. Please contact PIMCO Europe Ltd for more information. For additional information and/or a copy of the Fund's prospectus, please contact the Administrator: State Street Fund Services (Ireland) Limited, Telephone +353-1-776-0142, Fax +353-1-562-5517. ©2024.

Investment restrictions —In accordance with the UCITS regulations and subject to any investment restrictions outlined in the Fund's prospectus, the Fund may invest up to 100% of its net assets in different transferable securities and money market instruments issued or guaranteed by any of the following: OECD Governments (provided the relevant issues are investment grade), Government of Singapore, European Investment Bank, European Bank for Reconstruction and Development, International Finance Corporation, International Monetary Fund, Euratom, The Asian Development Bank, European Central Bank, Council of Europe, Eurofima, African Development Bank, International Bank for Reconstruction and Development (The World Bank), The Inter American Development Bank, European Union, Federal National Mortgage Association (Fannie Mae), Federal Home Loan Mortgage Corporation (Freddie Mac), Government National Mortgage Association (Ginnie Mae), Student Loan Marketing Association (Sallie Mae), Federal Home Loan Bank, Federal Farm Credit Bank, Tennessee Valley Authority, Straight-A Funding LLC, Government of the People's Republic of China, Government of Brazil (provided the issues are of investment grade), Government of India (provided the issues are of investment grade).

Important Disclosures

A word about risk: Investing in the **bond market** is subject to risks, including market, interest rate, issuer, credit, inflation risk, and liquidity risk. The value of most bonds and bond strategies are impacted by changes in interest rates. Bonds and bond strategies with longer durations tend to be more sensitive and volatile than those with shorter durations; bond prices generally fall as interest rates rise, and low interest rate environments increase this risk. Reductions in bond counterparty capacity may contribute to decreased market liquidity and increased price volatility. Bond investments may be worth more or less than the original cost when redeemed. Investing in **foreign denominated and/or domiciled securities** may involve heightened risk due to currency fluctuations, and economic and political risks, which may be enhanced in emerging markets. Currency rates may fluctuate significantly over short periods of time and may reduce the returns of a portfolio. Sovereign securities are generally backed by the issuing government, obligations of U.S. Government agencies and authorities are supported by varying degrees but are generally not backed by the full faith of the U.S. Government; portfolios that invest in such securities are not guaranteed and will fluctuate in value. **Inflation-linked bonds (ILBs)** issued by a government are fixed-income securities whose principal value is periodically adjusted according to the rate of inflation; ILBs decline in value when real interest rates rise. **Mortgage and asset-backed securities** may be sensitive to changes in interest rates, subject to early repayment risk, and while generally supported by a government, government-agency or private guarantor there is no assurance that the guarantor will meet its obligations. High yield, lower-rated securities involve greater risk than higher-rated securities; portfolios that invest in them may be subject to greater levels of credit and liquidity risk than portfolios that do not. **Derivatives** may involve certain costs and risks such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested. **Diversification** does not ensure against loss.

PIMCO Europe Ltd (Company No. 2604517, 11 Baker Street, London W1U 3AH, United Kingdom) is authorised and regulated by the Financial Conduct Authority (FCA) (12 Endeavour Square, London E20 1JN) in the UK. Important Disclosures

Acronyms and definitions of investment terms used throughout the report:

Alpha is a measure of performance on a risk-adjusted basis calculated by comparing the volatility (price risk) of a portfolio vs. its risk-adjusted performance to a benchmark index; the excess return relative to the benchmark is alpha.

Average coupon is the average of the coupon payments of the underlying bonds within the portfolio.

Average effective maturity is a weighted average of all the maturities of the bonds in a portfolio, computed by weighting each bond's effective maturity by the market value of the security.

"Bend-but-not-break" refers to credits that PIMCO would not expect to default in a credit-stressed environment.

Beta is a measure of price sensitivity to market movements. Market beta is 1.

Breakeven inflation rate (or expectation) is a market-based measure of expected inflation or the difference between the yield of a nominal and an inflation-linked bond of the same maturity.

Carry is the rate of interest earned by holding the respective securities.

The terms **"cheap" and "rich"** as used herein generally refer to a security or asset class that is deemed to be substantially under- or overpriced compared to both its historical average as well as to the investment manager's future expectations. There is no guarantee of future results or that a security's valuation will ensure a profit or protect against a loss.

CPI is the Consumer Price Index.

The **credit quality** of a particular security or group of securities does not ensure the stability or safety of an overall portfolio. The quality ratings of individual issues/issuers are provided to indicate the credit-worthiness of such issues/issuer and generally range from AAA, Aaa, or AAA (highest) to D, C, or D (lowest) for S&P, Moody's, and Fitch respectively.

Dividend yield is represented by the weighted average coupon divided by the weighted average price.

Duration is the measure of a bond's price sensitivity to interest rates and is expressed in years.

Effective duration is the duration for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change.

Forward curve is a function graph that defines the prices at which a contract for future delivery or payment can be concluded today.

Fallen angel is a bond that was initially given an investment grade rating but has since been reduced to below investment grade status.

GFC is the Global Financial Crisis.

Information ratio is a ratio of portfolio returns above the returns of a benchmark to the volatility of those returns.

Like-duration Securities are calculated by the index provider by comparing the index return to a hypothetical matched position in the security.

LNG is Liquefied Natural Gas.

The **Option Adjusted Spread (OAS)** measures the spread over a variety of possible interest rate paths. A security's OAS is the average return an investor will earn over Treasury returns, taking all possible future interest rate scenarios into account. The OAS is the net spread over the swap curve that will on average be earned if the security is held to maturity.

Rising star is the term given to a bond that was rated high yield but has since been upgraded to investment grade.

"Risk assets" are any financial security or instrument that are likely to fluctuate in price.

Risk premia is the return in excess of the risk-free rate of return an investment is expected to yield.

Roll yield is the yield that a futures investor captures as their long position in a futures contract converges to the spot price.

"Safe haven" is an investment that is expected to retain or increase in value during times of market turbulence.

"Safe Spread" is defined as sectors that we believe are most likely to withstand the vicissitudes of a wide range of possible economic scenarios. All investments contain risk and may lose value.

The **SEC yield** is an annualized yield based on the most recent 30 day period. The subsidized yield includes contractual expense reimbursements and it would be lower without those reimbursements. The

Unsubsidized 30 day SEC Yield excludes contractual expense reimbursements.

Tracking error measures the dispersion or volatility of excess returns relative to a benchmark.

To relate the price sensitivity of ILBs to changes in nominal yields, yield beta is applied to nominal changes to arrive at a price sensitivity of ILBs to changes in nominal rates. A **yield beta** of 0.90 implies that if nominal yields move 100 basis points, real yields will move 90 basis points. ILBs with long maturity may respond differently to changes in nominal rates than shorter maturity ILBs.

The distribution yield for monthly paying Funds is calculated by annualizing actual dividends distributed for the monthly period ended on the date shown and dividing by the net asset value on the last business day for the same period. The distribution yield for quarterly paying Funds is calculated by taking the average of the prior four quarterly distribution yields. The quarterly distribution yields are calculated by annualizing actual dividends distributed for the quarterly period ended on the most recent quarterly distribution date and dividing by the net asset value for the same date. The yield does not include long- or short-term capital gains distributions.
